

Name: Lira Hakani
Position: Member Organisations (MOs) officer

This is my second mandate in the Executive Board of YEE. The year went again very fast, participating in virtual and physical meetings, making decisions, suggestions, improvements and communications. Being in the board for the second time helped me to feel more familiar with the international atmosphere of the network and the strength that this umbrella of organisations offers. I am happy that this network exists and that it offers the opportunity to young people to discover themselves to learn and to be prepared for their life.

During this year:

- I participated in Skype meetings and physical meetings.
- I gave my opinion for different decisions during the year.
- I was in communication with the MOs.
- I prepared a new file where the MOs can fill their information. Based on this we will develop a tool to facilitate the cooperation between them.
- I am involved in two different working groups that were created after the physical board meeting in Prague, February 2015. The groups aim to strengthen YEE and to make it as much as possible a more recognized organization.
- I added organisations to our list of potential organisation to join YEE network
- I contacted passive MOs in order to reactivate them.

I would have liked to be more actively dedicated and to be in closer contact with the MOs of the network. In the same time, although I did not achieve everything I planned, my contribution was constant throughout the year. During my work for YEE I always thought of the best option for the network, I was open for other opinions and supportive to new ideas. I had a good cooperation with board, secretariat and EVS. I have mostly fulfilled my tasks on time.

This is my last mandate in YEE board. In this way I would recommend to everybody to apply for this position. It is a perfect opportunity if you are in the first steps of your working life and if you want to gain more experience. Being passionate for environmental issues will be an added value as you will have the opportunity to get useful information every day.

For further information please feel free to contact me or to meet during the Annual Meeting 2015.

Best regards!

Lira Hakani
